MOB OF 15,000 WORKMEN AT FORD PLANT; FIRE HOSE USED TO KEEP IT BACK

Start of the New Plan To-day
to Divide the \$10,000,000
Profits.

RUSH THROUGH DOORS.

Hurl Bricks and Stones in a
General Assault Which Lasts
Until Police Arrive.

(Special to The Evening World.)
DETROIT, Mich., Jan. 12.—The factory of the Ford Motor Company was stoned to-day by thousands of men who had been showered with water from hose in the hands of the city firemen. A big company of policemen was sent to protect the plant from the onslaughts of the men and boys who have gathered in Detroit to seek employment with a concern that began to-day to pay not less than \$5 a day to all laborers no matter how humble their task.

Since the announcement that Mr. Ford is to distribute \$10,000,000 among his employees, establish an eight-hour day with a \$5 minimum wage scale, and add 4,000 men to the working force of the company, Detroit has been the scene of a matter of fact, it is believed that hundreds of mechanics have thrown up their jobs in automobile factories in towns and cities in Michigan, Indiana, Ohio and Illinois, and hastened to Detroit to get in on the Ford distribution and improved working conditions.

CROWDS OF JOB HUNTERS CAME THE NEXT DAY.

On the day after Mr. Ford made the announcement of his intentions with respect to his automobile plant upward of 2,000 men stormed the gates of the factory looking for employment. Almost without exception these were residents of Detroit. Many of them were out of work, unskilled, and looking for laborers' jobs. Others were mechanics employed in other plants, who took a day off to seek employment in the Ford works.

The seekers for work were told that there would be no change in the method of selecting employees; that each applicant would be investigated and only men fitted for the work would be selected. A vain attempt was made to impress upon them that the increased force would be recruited slowly and that no good could possibly come from a forcible attempt to get a job.

But the crowd had doubled in size the next morning. On each succeeding day the mob clustered about the big plant grew in volume. Many remained at the gates all night to be close by at the opening hour in the morning.

The climax came to-day when at least 15,000 men had assembled around the plant by daylight. At first the crowd was quiet and affected only by such excitement as would be natural in such a large assemblage of job hunters. But, as the morning wore on and there were no signs of the employment of men, the mob became restless.

MANY IN THE CROWD SUFFER FROM COLD.

It was bitterly cold, the thermometer

(Continued on Second Page.)

ZERO WEATHER DUE TO-MORROW; HOIST RED BALL

Mercury Will Register 10 Above
by Midnight To-Night and
Continue to Drop.

By midnight to-night, according to the weather forecaster, the thermometer in New York will register 10 degrees above zero, and to-morrow night it will be down to zero. At 11 o'clock this morning the first flurry of snow was wafted in from the West and the mercury began to fall.

The cold wave which will hold New York and vicinity for several days in general. The present centre nearest New York lies over Montreal and Newfoundland. There is a second and greater storm centre advancing rapidly from the West. The snow feasting, which began late this morning, was only the first advance work of the forces of Gen. Boreas.

The red ball went up on the lake in Van Cortlandt Park to-day. This means the open season for skating. And skaters and skaters were in evidence in response to the high ball. By noon about 300 men, women and children were cutting some ice. And the ice was fine.

It was cold last night in the park and it was cold this morning. But what do you mean, you say, and heavy? The ice experts went out and looked over the lake. The ice was better than five inches thick. So they hoisted the ball.

Pretty soon the news travelled downtown and the subway and "L" were packed with people who had skates. What did they care about the cold? And pretty soon it wasn't cold at all in the park. Not if you had your skates with you. Rosy checked skirts and bright eyed lads were whirling and swirling around on the frozen pond.

Come on, fellows, the skating's fine!

SAYRES ENDING HONEYMOON

White House Bride and Groom Sail for Home Wednesday.

PARIS, Jan. 12.—Francis Boyne Sayre and his bride, formerly Mrs. Jessie Woodrow Wilson, were the guests of honor to-day at a luncheon given by Ambassador and Mrs. Myron T. Herrick. Mrs. Anna Wilson Howe of Philadelphia, a sister of the President, was among the guests.

Mr. and Mrs. Sayre, according to their present plans, will sail for New York on Wednesday on board the Mauretania from Cherbourg. The Mauretania has been substituted for the Philadelphia, which was to have sailed on that day. Mr. and Mrs. Sayre passed their time in Paris quietly visiting most of the places of interest to foreigners.

JULIUS DISBANDS HIS ARMY.

Former Sheriff Calls in Hedges He Gave his 2,400 Deputies.

Former Sheriff Julius Harburger to-day issued a statement regarding his special Deputy Sheriffs to return their shields to his residence, No. 48 St. Mark's place, Manhattan.

Mr. Harburger said that there are 2,400 deputies whose term of office expired at midnight, Dec. 31, 1913.

"Many shields have been lost," said the former Sheriff. "and some finders have used them for nefarious purposes."

GIRL FORGETS HER NAME.

Found in a Hysterical Condition and Taken to Hospital.

A girl about eighteen years old was found today in a state of hysteria near Fifty-ninth street and Madison avenue and taken to the Metropolitan Hospital for observation.

She was unable to tell Policeman Hedges her name or address and appeared to be suffering from amnesia. The girl is about 5 feet tall, weighs 110 pounds, is light complexioned, wears a blue velvet hat, blue coat and black skirt.

POLICE DOING WELL, DECLARES MITCHEL; TOLD TO USE CLUBS

Must Exercise Discretion, However, in Welding Sticks on Ordinary Law Offenders.

COURTS PROMISE AID.

Judge Rosalsky, Sentencing Slayes, Approves Strong-Arm Crusade Against Gangsters.

"The police seem to be doing very well," said Mayor Mitchell to-day. They are going along vigorously. That's what I told the Commissioner I wanted them to do. I told him to be unrelenting and keep right after the gangs."

"Mr. Mayor," he was asked, "your statement of Saturday was interpreted to mean that you will countenance the use of clubs on gunmen."

"Yes, I hope the police use their clubs on every gunman on whom they can lay their hands," replied the Mayor. "I don't by any means, however, intend to relax the very admirable policy of the late Mayor Gaynor with reference to the use of clubs on decent citizens. I shall have no hesitancy, however, in sanctioning the use of clubs on men who start gun shots in the street."

Modern methods should be adopted," Judge Rosalsky said, "in suppressing these gangs of young hoodlums that infest our city. They quarrel among themselves and shoot promiscuously, with the result that innocent persons are either killed or badly injured. It is time to call a halt."

Santa Barbara, twenty-five years old, of No. 12 West One Hundred and Sixteenth street, and Joseph Visetti, twenty-two years old, of No. 330 East One Hundred and Thirtieth street, who shot and killed Jerry Maida, another gang leader, in front of Paul Kelly's garage in West Forty-first street, last June, were arraigned for sentence.

The testimony showed that the members of two gangs had quarreled as to the territory their White Slaves were to patrol.

Judge Rosalsky sentenced Barbara to Sing Sing prison for a term of not less than eight years and three months nor more than fifteen years, and Visetti to not less than seven years and nine months nor more than eighteen years and six months.

KAISER WIELDS AN AXE TOILING WITH WORKMEN ON HIS PALACE ESTATE

Saws Wood Too and Gives Result of Labor to Peasants—Kaiserin an Overseer.

POTSDAM, Germany, Jan. 12.—Emperor William for several days past has joined the day laborers in sawing and splitting wood on the imperial estates surrounding Sans Souci Palace. He was advised by his physicians to take a course of manual labor and he spends every forenoon in the grounds working zealously with one or other of the laborers.

His Majesty is said to take great pride in his part in the work. He is said to be then presents to the laborer for use in his home.

Those who have watched the Emperor say that he wields the axe with great energy while the Kaiseress often looks on and jokingly checks the work he accomplishes. The Emperor's aides-de-camp are occasionally called upon to assist in the work.

BLAST BY MITCHEL IS FIRED TO OPEN AQUEDUCT TUNNEL

Hundreds of Feet Under the Ground Mayor Pushes Button That Sets Off Charge.

CITY OFFICIALS PRESENT

All Are Lowered Down Shaft for Ceremony—Tube Now Open Entire Length.

Surrounded by a distinguished company of city officials, Mayor Mitchell, standing at the foot of the Catskill aqueduct shaft at One Hundred and Fifty-ninth street and St. Nicholas place, 60 feet underground, fired the last blast for the opening of the 11½-mile long Catskill aqueduct tube between Ashokan dam and Schermerhorn street, Brooklyn. In the preparatory work Saturday a hole was broken through the rock. The Mayor's "shot" to-day cleaned out the bore to its full diameter. The so-called "city aqueduct," the section between Yonkers and Brooklyn, is now the longest tunnel ever driven in the world. It is eighteen miles and a little more in length, while the whole tube is 11½ miles long.

Mayor Mitchell went to the head of Shaft No. 2, which is at One Hundred and Fifty-ninth street, at 11.30 o'clock. He had been preceded by President of the Board of Aldermen, George B. McAnany, Comptroller Frederick B. Borah, President Mark F. Pendergast, Mathewson, Connolly, Police Commissioner McKay, Fire Commissioner Adamson, Bridge Commissioner A. A. C. Smith, Park Commissioner Cabot Ward, Commissioner of Accounts Straus, Chadwick and Galvin and about a hundred others, all of whom had been taken down by turns in a bucket-hoist carefully secured and especially carpeted for the occasion.

"Welcome," spelled out in electric lights, greeted the Mayor as he stepped out into the big chamber in the rock at the foot of the shaft.

Mr. Straus, President of the aqueduct commission, made a brief speech in which he congratulated the Mayor on being in office when such a critical step in the greatest of waterworks undertakings was accomplished.

The Mayor replied that it was a great source of satisfaction to him to have an actual part in the completion of so great an undertaking, significant as it was of the greatness and resourcefulness of the city of which he had the honor of being Mayor.

Then Engineer Smith led the Mayor to a battery on a deal table. Everybody stood on his toes and put his fingers in his ears. The Mayor looked as though he would like to, but he could not hold his ears and push the button at the same time. With a whimsical smile, he pressed the button.

There was a mighty shock, the rock trembled and sand and dust dribbled down the rocky sides of the shaft. Instantly from the place of the blast, 230 feet to the north, came a mighty puff of air which staggered some of those who were teetering on their toe tips.

The bulkhead door which safeguards shaft chambers from the full concussion of blasts, was then thrown open and the guests and officials were seated in little dinky rock cars which are propelled by electricity from a live wire running within easy reach of the passengers. Foremen and watchmen constantly shouted "Look out for the live wire. Keep your heads and hands down," but there were no fatalities.

Within a hundred yards of the site of the blast the car was stopped by broken rock, scattered by the blast.

The party clambered over a rocky stretch through the cleared away space and emerged into that part of the tunnel controlled from Shaft No. 8 at one hundred and sixty-eight street and Edgewood avenue. Here the walls of the tube had all been neatly cemented and the going was pleasant. Everybody was bucketed to the surface again and the ceremonies were over.

Mayor as He Fired Last Blast That Opened Catskill Aqueduct

STREET GUN FIGHTERS SHOOT A WOMAN AND PUT CROWD IN PANIC

Man Cut by Glass as Stray Bullet Goes Through a Store Window.

Monroe street, near Catherine, a favorite market place of the lower east side, was crowded at noon to-day with men and women when two Italians met in front of the bank of R. J. Bajardi, at No. 5 Monroe street, and drew revolvers. Each fired two shots as he ran for cover.

At the report of the first shot there was a chorus of wild yells from the street as the crowd scattered for doorways in a panic. Women were knocked down by men who thought only of escaping from the gunfighters, and the street was in an uproar though the shooting lasted only a few seconds.

When Policeman Rowan of the Oak street station, who had heard the reports, got there he found the street almost deserted, but Mrs. Maria Faraxio, a young woman of No. 146 Cherry street, was screaming in front of "Condolero Gatto's" grocery at No. 6 Monroe street. She had been shot through the left arm by a bullet that went wild. Inside the store, Gatto, his son-in-law and a clerk were taking care of Vincenzo Gatto's grocery at No. 1 Monroe street, whose face was cut by glass, which had been shattered when one of the bullets had passed through Gatto's shop window.

Capt. Mahoney and the reserves searched the neighborhood, but got no trace of the men who did the shooting. Gatto declared that he knew nothing of the shooting, and that it wasn't directed at him. Last October he received several Black Hand letters, and on Oct. 12 his store was dynamited with a bomb.

Mrs. Faraxio was sent to the Hudson Street Hospital and Monino went home. The police have a description of the men who did the shooting.

350 EARTH SHOCKS WITH VOLCANIC SPOUT TERRORIZE JAP ISLANDS

Two Villages Buried by Ashes and Many Residents in Peril—Rescue Forces at Work.

TOKIO, Japan, Jan. 12.—A series of 350 earth shocks terrorized the town of Kagoshima, at the southern end of the island of Kishiu to-day, and were followed by the eruption of a volcano on Sakura, a small island in the Gulf of Kagoshima, where two villages were buried in ashes.

The earthquakes continue incessantly and the work of rescuing the inhabitants of Sakura by boats, which has proceeded there, across the intervening three miles of water from Kagoshima, is extremely difficult.

Ashes have fallen all day in Kagoshima itself and telegraphic communication with the capital is interrupted.

NO HELLOS ON THE CITY.

Mustn't Use Father Knick's Phones for Social Calls.

Bridge Commissioner Kracke issued orders to-day that telephones in his department are not for social calls. If an employee of the department wants to phone a wife that he won't be home to dinner he must get special dispensation, as it were. The young lady in charge of the switchboard will ask his name and write it down. At the end of the week she will submit this list to the Commissioner.

It is understood that this wave of economy will hit every telephone in the various departments of the city.

Aviator Falls 2,000 Feet.
SANTIAGO, Chile, Jan. 12.—Lieut. Mary, a military aviator, while making a flight yesterday, fell from a height of 2,000 feet and was dashed to pieces.

LIBERTY FOR THAW EVEN IN NEW YORK UNDER BAIL BOND

Bail Accepted by United States Court Will Serve as Passport Anywhere in the United States, His Lawyers Declare.

CARMODY IS PLANNING TO ORDER ARREST AGAIN

Thaw Expected to Avoid New Tangles by Remaining Near Concord Until Final Decision.

CONCORD, N. H., Jan. 12.—Counsel for Harry Thaw say they have consulted with authorities on the Federal laws and that the judgment of the Federal Court Commission that Thaw is sane will insure him immunity from arrest by State authorities anywhere after he is admitted to bail by Judge Aldrich. In other words, a bail bond accepted by the Federal Court in this district will act as a safe passport for him anywhere in the United States, even in New York State, according to the understanding of his lawyers.

However, Thaw says that he will remain in New Hampshire pending the final determination of his appeal to the Federal courts from the extradition warrant granted by Gov. Feltner of New Hampshire. His counsel have heard that the New York authorities will seek to cause his arrest in any Federal district outside of this state. He has also been advised that it might be dangerous for him to go to New York where he would probably be arrested on some technicality and be compelled to resort to habeas corpus proceedings to procure his freedom.

Thaw appears to be deeply satisfied over the decision of the commission that he is mentally fit—this having been his contention for several years past.

"MOTHER" JONES TAKEN PRISONER BY STATE TROOPS

She Returned to Colorado Strike Centre After Deportation—Held Incommunicado.

TRINIDAD, Col., Jan. 12.—"Mother" Jones, strike leader, who was deported from the Southern Colorado coal fields Jan. 4 by the militia, returned to Trinidad to-day from Denver. As soon as her presence was learned by the military authorities she was arrested and taken to the San Rafael Hospital, where she was held incommunicado.

"Mother" Jones left the train at the outskirts of Trinidad and later appeared at a local hotel. She was arrested by a detail of State troops, hurried out of the hotel, placed in an automobile and whirled through the streets with a cavalry escort galloping at full speed in front and behind the machine.

Several hundred coal mine strikers lined the streets and cheered wildly, while Mother Jones waved her hand in response.

NO PARDON FOR TOLMAN.

ALBANY, Jan. 12.—Gov. Glynn this afternoon announced that he had refused to pardon D. H. Tolman, the loan shark. He said that it would be impossible to determine within two months the value of the \$200,000 worth of notes which Tolman said he would burn if granted executive clemency. He said District Attorney Whitman had declined to recommend any action. Tolman, who has maintained offices in all parts of the country, was sentenced to six months imprisonment.

"Upon the question of whether or not the Commissioner has any public relations, and in consequence the belief that Thaw would not be a public menace it says that Thaw is suffering from any of these forms of mental disease alleged at the time of his trials for the killing of Stanford White."

Big Increase In Answers to World Ads.

To the comparatively limited number of World advertisements printed last year having addresses one of the World's up-town offices, at Broadway and 58th street,

456,787 ANSWERS WERE RECEIVED—OVER 88,000 MORE THAN DURING THE PRECEDING YEAR.
